

RANDABERG COATING INFORMATION RELATED TO THE COVID-19 PANDEMIC

The main priority for Randaberg Coating AS (RC) is the health and safety of our employees, Clients and vendors. Our Emergency Management Team (EMT) have handled the corona virus and relevant measures.

With the recent update from the Norwegian authority, we are now moving to a normal everyday life with increased emergency preparedness. The increased preparedness points are well implemented to all, including Randaberg Coating personnel, contributing to a very limited impact on our daily work operations and number of infected personnel. We are proud to state that no infected personnel have been physical attending work within our company premises.

We are pleased to once again welcome external parties such as Clients, end-users, and others to our facilities at Randaberg!

The recommendations and instructions from the Norwegian Institute of Public Health and the Norwegian Directorate of Health shall still apply and further details can be found on their home page:

The remaining part of 2021 will be filled with various celebrations and activities marking 75-year celebration for our Parent Company, and we hope that future years will be prosperous and provide us with challenging and exiting projects and developments.

We are looking forward to continue making people happy and pleased!
